

# Senior Management Team

## Development and Engineering Services 2020 Divisional Priorities

Presented by: Sameer Dhalla, Director

February 26, 2020

# Development and Engineering Services– Priorities

## Strategy 2 – Manage our Regional Water Resources for Current and Future Generations (Support from Policy and Planning and Education)

- Undertake Floodplain Mapping (NDMP 300 maps across all watersheds), SPA and Regulation Mapping Updates by end of Q2
- Implement flood remediation projects, including flood feasibility studies and Environmental Assessments while supporting and coordinating with municipal partners (details provided on HUB)
- Delivery of TRCA's Flood Forecasting and Warning Program including Technology Enhancements by Q3
- Increase flood awareness through flood outreach including community meetings at TRCA's highest risk areas and participating in Municipal Emergency Preparedness events, by Q3)
- Operation and maintenance of TRCA's stream gauge and precipitation gauge networks plus strategic enhancements
- Operate, maintain, inspect and repair TRCA owned infrastructure including dams, dykes and channels
- Undertake Watershed Planning and Support Municipal Comprehensive Reviews (MCR)

# Development and Engineering Services– Priorities

## **Strategy 4 – Create Complete Communities that Nature and the Built Environment (Support from Policy and Planning and Education and Training)**

- Achieve Development Planning and Permitting (DPP) and Infrastructure Planning and Permitting (IPP) timelines
- Streamline DPP and IPP review including enhancing relationships with Municipalities and Building Industry to improve quality of development applications and reduce review times
- Deliver external training to educate and train municipal partners and the building industry technical guides, complete application, flood conference)
- Continue compliance inspections relating to permit plans and conditions issues through DPP and IPP
- Modernization of TRCA's Planning/Permit Application, Review and Enforcement System (PARES) – working closely with ITM
- Finalize Service Level Agreements and MOUs – working closely with Corporate Services and Government and Community Relations

# Development and Engineering Services– Priorities

## **Strategy 9 – Measure Performance (Support from Strategic Business Planning and Finance)**

- Undertake Business and Financial Planning for the Division including review and development of updated metrics and key performance indicators (KPI) and meeting financial timelines
- Produce updated Watershed and Living City Report Cards

## **Strategy 11- Invest in Our Staff (Support from HR)**

- Invest in our staff by providing staff training (health and safety, specialized training), re-staffing positions and setting workplan objectives (Q1-Q4)
