Thanks Shari - how easy is it to update those filters when new data is available ? Is it as simple as replacing the data in the back end and then it will re-do the calculations?

**[11:25 AM] Melanie Book**

Does the monitoring happen on the same schedule year over year? Or does it change? If yes, why?

Hi Sharon, this may have already been said but I was late logging onto the L&L. Is this reporting hub accessible to the general public?  
(1 liked)

**[11:33 AM] Sharon Lam**

Yes Melanie! The Reporting Hub is available publicly here:

Thank you Rick Portiss and Shari Dahmer

**[11:40 AM] Laura DelGiudice**

You can also select both a municipality and a watershed together.

**[11:41 AM] Sharon Lam**

For anyone who voted "Other", would you mind specifying who else you would like to share the Hub with?

**[11:42 AM] Rick Portiss**

would share with Academics

**[11:43 AM] Melanie Book**

Sharon Lam my "other" is direct with family or friends, I consider "public" to be social channels.

**[11:45 AM] Sharon Lam**

Thanks Melanie!

**[11:47 AM] Nathaniel Magder**

There is so much info here, this is great! I am wondering if there is plans for increasing the monitoring scope in the future - e.g. air quality, microplastics?

(6 liked)

**[11:48 AM] Jehan Zeb**

Some comparison with other jurisdiction watersheds may be helpful.

**[11:53 AM] Elizabeth Wren**

Thank you!

**[11:54 AM] Shari Dahmer**

I didn't show it but the Water Resource System mapping is available on the WRS page of the Reporting Hub
